EXPERIENCE

Full-Stack Developer/Tech Owner

LiveE

📅 03/2022 - Present 📍 Paris, France

A company providing a modular digital platform for organizing virtual, hybrid, and in-person events, offering features such as agendas, registration, messaging, and a variety of interactive tools.

- Developed multiple React/Next.js-based admin platforms with MUI
- Maintained Express.js/Hapi.js/PostgreSQL/Nest backend with PostgreSQL
- Developed mobile apps using React Native with Expo
- Delivered mobile apps to Apple Store and Play Market
- Managed infrastructure with Heroku, Netlify, and GitHub
- Set up and integrated a range of marketing and analytics tools
- Owned the full codebase and release process

Full-Stack Developer (Part-time)

Kawunu GmbH + BYTABO Digital Crew

📅 03/2021 - 03/2022 📍 Bamberg/Regensburg, Germany

🔗 <https://bytabo.de>

IT company that develops digital products and platforms, combining software development with design thinking and a focus on user experience.

- Developed a React-based taxi booking platform
- Built and maintained an admin platform with Angular and Material Design
- Contributed to the backend using Express.js, Sequelize, and PostgreSQL
- Took part in UI/UX refinements to enhance UX

Frontend Developer

Be | Shaping the Future Ukraine

📅 04/2019 - 02/2021 📍 Kyiv, Ukraine

IT company specializing in solutions for banks and financial institutions, operating in Ukraine since 2013 as part of an Italian group.

- Developed a banking web application for internal operations
- Used Angular 8 and PrimeNG
- Created custom UI components with SCSS and Pug
- Worked closely with QA and back-end teams
- Collaborated on the development of 5 diverse web applications

EDUCATION

Master's degree, Mathematics

Taras Shevchenko National University of Kyiv

Postgraduate Studies, Mathematics

Institute of Mathematics, NAS of Ukraine

CONTINUING EDUCATION IN 2025

Cursor AI: Learn by Building Full-Stack Next.js 15 App

Master AI-Assisted Development by Building a Real-World Kanban Board

Advanced React: Design Patterns and Performance

In-depth expertise in Design Systems, Design Patterns and Performance.

Microfrontends with React: A Complete Developer's Guide

Build incredibly scalable apps with a microfrontend architecture

SUMMARY

Full-Stack Developer **with 8+ years** of experience building scalable web and mobile applications, with a strong foundation in mathematics and a holistic understanding of system architecture and product development.

I've delivered end-to-end solutions for several European companies — from UI implementation to API design, database modeling, and deployment — working across the entire development lifecycle.

Core technologies include:

- **Front-end:** React (5+ yrs), Angular (3+), Next.js,
- **UI Frameworks:** MUI, Material Design, Atlassian,
- **Mobile:** React Native (3+), Expo, EAS,
- **Back-end:** Express.js, Hapi, Nest.js, PostgreSQL,
- **Databases:** PostgreSQL, MongoDB, Sequelize,
- **DevOps:** Docker, GitHub CI/CD, Heroku, Netlify.

I'm seeking a full-stack role where I can contribute across the entire stack: building APIs and creating user interfaces.

I am ready to take ownership of features from concept to production.

KEY ACHIEVEMENTS

In my most recent role

I initially joined a small team and, following the product launch, took over as the sole developer — leading the platform's evolution as a full-stack engineer for over 4 years.

Beyond hands-on development, I led several technical and architectural improvements, including:

- implementing authentication with Auth0,
- adding CSV export/import functionality,
- migrating React application to Next.js,

I also handled all UI/UX design for new features and websites myself — including [this one](#).

SKILLS

React.js	Angular	Next.js	Redux
React Native	Material Design	MUI	
MongoDB	PostgreSQL	Nest.js	
Express.js	Hapi.js	PostgreSQL	
Docker	GitHub	Heroku	Netlify
Google Ads	SEO	WordPress	
Google Analytics	Google Tag Manager
